*Due to data cleaning that took place on March 24, our total case count has increased. These cases occurred over the course of the pandemic and do not represent a recent increase of cases.

State's Online Eligibility Tool No Longer Required Starting March 31

Phase Finder will no longer be required to verify COVID-19 vaccine eligibility. Instead, people who want a vaccine should check DOH's [priority guidance webpage](#) and, if eligible, use the [Vaccine Locator](#) to find an appointment. Read the full news release [here](#).

- If you live or work in Pacific County and want the COVID-19 vaccine, go to our website, pacificcountycovid19.com, and click on the Vaccine Information link.
 - If you are eligible for the vaccine, you can see a list of clinics currently taking appointments and you can make yourself an appointment. If there are no clinics taking appointments, you can sign up on our waitlist.
 - If you are not eligible yet for the vaccine, you can sign up on our waitlist.
 - We will email you when appointments are available.
 - If you are interested in looking for appointments across the state, go to <https://VaccineLocator.doh.wa.gov> (in Spanish: <https://VaccineLocator.doh.wa.gov/?language=es>)

Updated DOH Guidance as of March 29:

[Farm and Agricultural Workers Guidance](#) — Summary of changes:

- Updates to isolation, quarantine or entry testing, and masking and medical monitoring language.
- Additional details about responding to outbreaks.

[Farm and Agricultural Workers Outbreak Line List](#) — Summary of changes:

- New document that serves as a Farm and Agricultural Worker Outbreak list for employers.
- The document is linked in the [Farm and Agricultural Workers Guidance](#).

[Long-Term Care Facilities \(LTCF\) Visitor Log](#) and [Visitor Announcement Poster](#) — Summary of changes:

- Updates to the Visitor Log to provide more information and tools. The current version is one of three tools in the new document: Screening Tool, Visitors Log example, and Letter to Visitors.
- Visitor Announcement Poster has additional language about vaccination because of updated LTCF Safe Start Guidance.

[Food Workers and Establishments](#) — Summary of changes:

- Phase 3 information added.
- Clarifications added to outdoor farmer's market and concession stands sections to align with Gov. Inslee's Roadmap to Recovery requirements.

[Homeless Shelters](#) — Summary of changes:

- Overall update as previous document was from March 2020.
- Expanded information on screening, distancing, ventilation, and PPE.

Washington Partnership Leverages AmeriCorps to Address Unprecedented Food Insecurity Efforts Across State

A partnership created last year helped make the AmeriCorps program more accessible to its members and addressed food insecurity for Washington families during the COVID-19 pandemic. Read the full news release [here](#).

Department of Health COVID-19 Long-Term Care Report

As of March 29, 2021, a total of 19,293 COVID-19 cases and 2,571 deaths have been identified as associated or likely associated with a long-term care facility (such as nursing home, assisted living facility, or adult family home). These cases include residents as well as employees and visitors. Read the full March 30 report [here](#).

DOH SARS-CoV-2 Sequencing and Variant Report.

This weekly report summarizes genome sequencing coverage of Washington SARS-CoV-2 specimens from multiple laboratories from across the United States and our state. It provides a statewide view of sequencing capacity and data, including breakouts by county and demographics. Read the full March 25 report [here](#).

Case Investigation and Contact Tracing Metrics for DOH Centralized Investigations.

This weekly report shows the timeliness of reaching COVID-19 confirmed and probable cases and their contacts for case investigations and contact tracing activities. Read the full March 24 report [here](#).

State Launches New Round of Working Washington Small Business Grants.

The Washington State Department of Commerce opened applications for Working Washington Grants: Round 4 on March 29. This newest grant round focuses on brick-and-mortar businesses most directly impacted by COVID-19 public health measures. Business owners can visit commercegrants.com for more information about eligibility, the documents required to apply, and how to reach someone for assistance.

Grants for Agricultural Businesses Coming Soon.

The Washington State Department of Agriculture will provide COVID-19 recovery grants for certain sectors of the agriculture industry, supporting disproportionately impacted and previously underserved agricultural sectors. Visit the [agency's grants page](#) for more information.

Cases of COVID-19 Vaccine Breakthrough Confirmed in Washington State

The Washington State Department of Health (DOH) is investigating reports of people in the state who tested positive for COVID-19 more than two weeks after being fully vaccinated. Scientists call these “vaccine breakthrough” cases, which are expected with any vaccine.

Large-scale clinical studies found that COVID-19 vaccines reduced the risk of getting COVID-19 in vaccinated people by up to 95% compared to people that did not receive the vaccine. However, the vaccines are not 100% effective in preventing infection. This means a small percentage of fully vaccinated people can be expected to still get COVID-19. These are identified as breakthrough cases.

Out of one million fully vaccinated individuals in Washington state, epidemiologists report evidence of 102 breakthrough cases since February 1, 2021, which represents .01 percent of vaccinated people in Washington. Breakthrough cases have been identified in 18 counties. The majority of those in Washington state with confirmed vaccine breakthrough experienced only mild symptoms, if any. However, since February 1, eight people with vaccine breakthrough have been hospitalized. DOH is investigating two potential vaccine breakthrough cases where the patients died. Both patients were more than 80 years old and suffered underlying health issues. Further investigation will help to identify patterns among people who have COVID-19 after vaccination, such as if a virus variant may have caused the infection. <https://www.doh.wa.gov/Newsroom/Articles/ID/2720/Cases-of-COVID-19-vaccine-breakthrough-confirmed-in-Washington-state>

Phase 3 Updates

Phase 3 will allow up to 50% occupancy or 400 people maximum, whichever is lower, for all indoor spaces. This applies to all industries and indoor activities currently allowed including:

- Restaurants
- Gyms and fitness centers
- Movie theaters

Sports guidance will change in Phase 3 to allow in-person spectators. Spectators will be allowed to attend outdoor venues with permanent seating with capacity capped at 25%. The change affects both professional and high school sports, as well as motorsports, rodeos, and other outdoor spectator events. Social distancing and facial covering are still required.

The new phase also allows for up to 400 people maximum to attend outdoor activities, as well as events in indoor facilities — so long as 400 people does not exceed 50% capacity for the location, and physical distancing and masking protocols are enforced. Larger venue events are capped at 25% occupancy, or up to 9,000 people, whichever is less, and must follow spectator guidelines.
